

Reliance RFM high Intensity Mixers are specially designed and engineered for the Rotomolding Industry. Reliance Rotomolding Mixers provide precise dispersion while giving easy clean features required when dealing with pigments.

RFM - Rotomolding Mixers

Reliance Rotomolding High Intensity Mixers run at 20M/S, which is the ideal speed to run Polyethelene Resin and Pigments. The units can be sized to run faster and supplied with a VFD to control the speed rate. A potentiometer or push button can be supplied to control the speed.

Standard Features:

- AISI 304SS Vessel, Lid & Discharge
- Pneumatic Lid & Discharge
- AISI 304SS Tools with Variant Design
- Temperature Sensor
- Control Panel with Timers
- Safety Switches

Available Features / Options:

- Mirror Finish
- View Port
- VFD in Control Panel
- PLC Panel
