

Weighing Systems

- Weighing accuracy of +/- 1/4%
- Accurate cut-off using fast, slow, jog, and free fall
- Modulating valves for liquid weighing systems
- Mass-flow designed scale hoppers

Conveying Systems

- Railcar unloading systems for PVC and CaCO₃
- Pressure/Vacuum Conveying of PVC, CaCO₃, TiO₂, waxes, and additives
- Liquid transfer system

Silos

- Welded or bolted storage silos for PVC, CaCO₃, and Dry-Blend
- Continuous level monitoring or load cells
- Installation services
- Skirted or (4) leg design

Mixing and Cooling Capabilities

- Mixing capacities of 2 million to 120 million pounds per year
- Process Optimization
- Mixing trial at Reliance facility

Automated Controls

- Total automation from railcar unloading to dry-blend storage
- Allen Bradley systems integrator
- Report generation
- Real time and historical trending
- Alarm log
- Remote monitoring and troubleshooting
